

### Travel pillow

This measures 30 cm long by 10 cm wide by 21 cm high. You have handles each side for carrying and is strong but lightweight. Velcro tabs hold the sides and lid in place making it easy to open.

When open, the lid folds underneath allowing for the gussets to create a skirt right round the pillow. Either side of the roller are a pin cushion and two compartment boxes that are interchangeable. The compartment box is to carry thread reels, spare bobbins etc. Just lift and move each to the other side if you prefer. The roller can be made to any size you require, but be aware this will alter that can be fitted into the space. (i.e. whether, or not, you can fit both a pin cushion and compartment boxes)

## Other types of pillows

Top one is a round 50 cm diameter pillow with three blocks that are able to be moved. The two part circles are fixed. This is great for long lengths of lace or when making corners. The depth of the pillow is 5 cm.

The underneath pillow is a “nine block” pillow. These are all able to move as required. It measures 46 cm square, with each block measuring 15 cm. The depth of the blocks is 6 cm. The sides of the pillow are velcroed with tabs to allow for easy movement of blocks.

Both are made of high density polystyrene, with a layer of wool felt and covered in either green or blue twill serge cotton fabric. Other colours can be requested. Just let me know.
